AV Field Installation Supervisor

Description

The Field Installation Supervisor is a working supervisor with responsibilities that include on-site leadership, work assignment, and prioritization of daily activities as directed by the Project Management staff while actively participating in the installation of audio, video, and theatrical lighting equipment. Activities and responsibilities include the installation of cabling, fiber optics, electronic devices, and audiovisual rigging systems. Additional responsibilities include the termination, labeling, and proper "red-line" notation of drawings for the eventual production of as-built system documentation. All installations must meet the highest quality standards as set forth by WPS, while assuring a professional and safe working environment. The Field Installation Supervisor is expected to be an ambassador on the jobsite, representing WPS with a high level of professionalism to the client and other trades.

WPS | Washington Professional Systems is an iconic, family-run AV systems integration company with over 35 years of experience. Our team are experts in their fields and are constantly helping customers solve complex and challenging problems. WPS clients include Fortune 500 companies, professional sports teams, famed international performance venues, recreation and theme parks, and governments at the local, state, and federal levels. WPS is well-respected and known in the industry for producing the highest quality work, regardless of budget or project size.
